

PITCH & BAT

This is a two character/two scene assignment. One character is to be the pitcher and the other the batter. The designs are of your own creation. Follow the standard screen direction followed in televised baseball games. The pitcher is standing on screen right facing screen left. They will anticipate back and then throw the ball to screen left and then recover. In the second scene, show the batter on screen left ready to swing at the ball. Show the ball entering from screen right. The batter anticipates and then swings and contacts with the ball. The character then follows through and recovers.

Deadline

Beginning of class - Week 12, 2nd semester (3 weeks)

Pitching Action:

• Anticipation		___/10
• Action (Primary) (Overall Body)		___/10
• Successive breaking of body joints (Overlapping Action) (Legs, hips, shoulders, head, arms)		___/30
